NEED A LITTLE EXTRA CASH?

Refer your friends and family to build with Self-Help Homes and earn up to $1,500 cash and/or other prizes!

Self-Help Homes (SHH) is rolling out a new Referral Incentive Program.

Beginning February 11, 2013 and going through June 30, 2013, SHH will pay $500 to the first three (3) people that refer a family that qualifies for the Self-Help Program and that family closes on a 502 Loan with USDA-Rural Development (USDA-RD). Also, all other people, beyond the first three (3), that refer a qualified family to the Self-Help Program and that family closes on a 502 Loan with USDA-RD will be paid $250 for each referral.

You will want to start referring all your friends and family to SHH because we are also going to reward you for sending in your friends and family to see if they qualify. If you refer someone to Self-Help Homes and they fill out a Pre-Qualification Application and list you as the person referring them, and then they don’t qualify for the program, SHH will provide you with a $25.00 Gift Card to a local restaurant or store.

You must make sure that your name, address and phone number are listed on the Pre-Qualification Application at the first appointment for any payout on these incentives. If the name is added after the first appointment, the incentive will not be awarded. Don’t wait! Refer someone today so you won’t miss out on these great incentives! Some restrictions apply.
Self-Help Homes is Currently Accepting Applications for MSH Homes in Elk Ridge, Santaquin and Heber Cities

Self-Help Homes (SHH) is currently accepting applications from families that are interested in building their own home through the Mutual Self-Help Program. SHH has recently purchased 72 lots in three different subdivisions. Two of the subdivisions, Crestview Estates and Elk Ridge Meadows, are located in the beautiful foothills of the scenic community of Elk Ridge. This quiet community offers spectacular views of the valley and surrounding mountains, wonderful neighbors, some of the best schools in the state, a safe environment for your family and a place to call home. Another subdivision where we have purchased new lots is Majestic Mountain Acres in Heber City. These lots have a dramatic view of Mount Timpanogos and are located close to schools, shopping, and all the outdoor activities that come with living in the Heber Valley! We also have eight lots in the Morley Meadows Subdivision in Santaquin. If you are interested in living in any of these great subdivisions, please contact us as soon as possible. We are planning to start groups in these areas very soon.
FAMILY SHOWS APPRECIATION FOR THE SELP-HELP PROGRAM!

In celebration of being in their new Mutual Self-Help (MSH) home for one year, the Adam & Chiara West family wanted to show their appreciation to the funders and others who helped them attain their dream of home ownership. With huge smiles on their faces, the West Family posed in front of their beautiful MSH home that was built in the Winegar Estates Subdivision in Payson, Utah. They built their home along with eight other families and contributed more than 1300 hours to build the nine homes in their group. Congratulations, West Family!

SHH has Home For Sale in a Great Santaquin Subdivision

HOME FOR SALE BY OWNER $187,000
164 West 580 South—Santaquin
Located in Morley Meadows Subdivision
Call us today to see if you qualify!

Thank you! Special thanks to our wonderful partners for their generous contributions! Your continued support is very much appreciated!
A beautiful lawn adds value to your property. Over time, all areas of the lawn experience some compaction. Heavy traffic areas have greater soil compaction, which makes it difficult for roots to breathe or get water and nutrients.. Aerating in spring and fall, yearly, will allow you to water less often and for shorter periods of time so your water bill will be lower.

The best aeration is done with a power aerator that removes cores of sod. They are available at hardware and equipment rental shops, but you can hire a professional for not much more. Be sure to water your lawn heavily the night before to make sure the ground is soft but not muddy. Aerate heavy traffic areas in two directions.

The cores contain micro organisms that will help to break down thatch in your lawn so leave them on the ground to break down or be broken up with your next mowing. Fertilize a week or two after the aeration to boost grass growth and keep weeds down.
